CLC-4024 39.4" x 23.6" LASER ENGRAVING / CUTTING MACHINE

Features:

- Heavy gauge sheet metal frame with back door design for opening to applied unlimited material length.
- Applications for numerous materials. Exaamples are, but not limited to wood, leather, marble, glass, paper, rubbery, plastic, cloth, acrylic, ABS and many more.
- Manufactured with a frame that is rigid enough to ensure long life of moving components and ability to hold +/- 0.01 mm accuracy.
- Unique optical structure of the fly ray which has low distortion and maintains a steady beam.
- Optical adjustments are made with relative ease.
- Adaptation of the K9 reflect lens and ZNSE focus lens with reflectivity and penetrability is the strongest among congener fittings. The facula is thinner with stronger power for cutting applications. With this combination it maximizes work efficiency and reduces the work piece cost.
- LCD screen with the USB interface for data input. DSP control system based on the stepper Up-Controller Unit of PCI Lines in PV. It adopts the world advanced DSP-TMS320, XC2S300 controller chip which has the advantage of high speed, stable, strong preventing interference.
- The machine software has multiple functions. It supports the following files : DWG, HDGL(PLT), BMP, DXF, G-code, DST and AI which can work with the software of AutoCAD, CorelDraw, and Photoshop.
- This software has power-off memory and continue from a stopped point functions.
