The RIGHT machine at the RIGHT price

Wide Belt Sander for use with metal

**Multi purpose machine used for
Polishing material, sanding for size, deburring parts after machining etc.**

Key Features:

- Heavy duty frame and sheet metal construction.
- Power feeding is accomplished by using variable frequency drives which will not only provide smooth operation, it makes changing or adjusting speed very easy.
- The In feed and out feed have spring loaded hold down rollers to ensure positive feeding without marking the material.
- Computerized thickness adjustment control with a digital read out. Key in the size you are desired and the table will automatically move to that size.
- Effective material removal is accomplished by using our large diameter contact drum. It has been dynamically balanced and has rubber coated spiral grooves.
- In feed belt is made from a caoutchouc base for safe, anti-slipping during sanding and transporting the work pieces.
- The abrasive belts are tracked by oscillating cylinders linked to the upper roller. The edge of the belt is detected by an electric eye sensor which in turn controls the air supply to the position via solenoid valve. A limit switch detects belt breakage and will stop the machine.

Specification	WS-M2560D	WS-M3775D
Max. Working Width	24"	36"
Max. Working Thickness	5"	5"
Drum Sanding Head	4.5" Diameter	5.9"Diameter
Sanding Motor	10 HP x 1	20 HP x 1
Sanding Belt Size	25" x 60"	37" x 75"
Feeding Motor	1 HP	1 HP
Feeding Speed (variable, inverter)	16 ~ 50 FPM	16 ~ 50 FPM
Thickness Control	Digital Computer	Digital Computer
Table Hoist Motor	1/4 HP	1/4 HP
Air Required	8 CFM	8 CFM
Power	220V or 440V 3 PH	220V or 440V 3 PH

MODEL NO: **WS-M2560D 25" METAL GRINDER SANDER \$15,900.00**

MODEL NO: **WS-M3775D 37" METAL GRINDER SANDER \$24,900.00**

Price is F.O.B Los Angeles. Freight & sales tax are not included.

Payment terms: 60% deposit and 40% before shipment.

Delivery will be 75 days after the conform order with deposit.
